ICT Resource Centre

Government scholarship awards are available to students. We have identified scholarship opportunities and bring together a team to work with students during the application process. Every year college felicitates and provides cash awards to meritorious students across all batches. Considering that many students come from disadvantaged backgrounds every year we identify scholarship opportunities and bring together a team to work with students during the application process. Until 2020, scholarships worth Rs. 1,50,33,780 have been received by students across all courses from the Government of Uttar Pradesh. A total of 409 students from various disciplines had received scholarships so far.

What Makes KCEM Standout Empowering Students with Knowledge

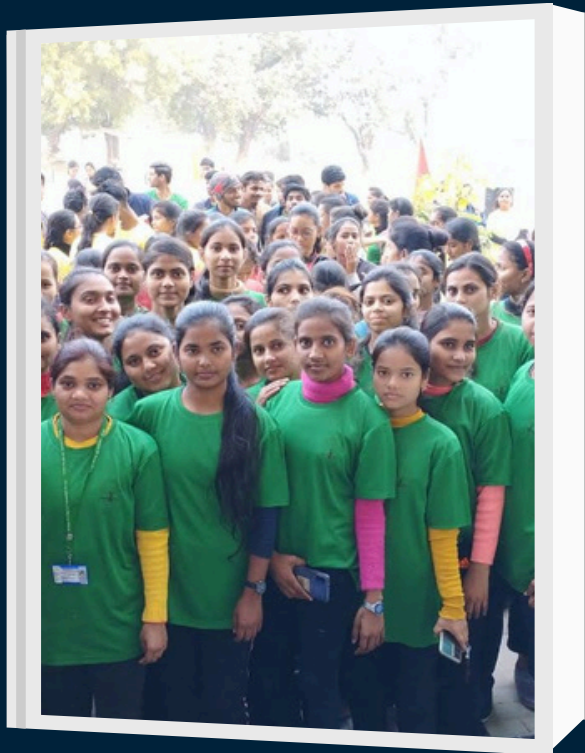

Our teaching methodologies aims to equip students with competencies for the future.

- Interactive Lectures engage students to help them understand core concepts with clarity. The students are exposed to classroom experiments, survey, simulation games or an analysis of secondary data.
- Teaching with Data simulation allows students to work with real data sets to develop analytical and critical thinking skills.

- Timely Assessment through regular individual and small group assignments provide educator with better understanding of what students are learning and motivate students to learn by working collaboratively.
- Regular Concept Testing of students through online quizzes and assessments.
- Industry Exposure through internship in varied companies, participating in CSR activities and attending conferences and seminars.
- Investigative Case - Based learning through case studies involve students in addressing real world problems through out of box thinking and critical reasoning.
